

EOSOL SPOTTING PASTE

Cat. no. 0745

Highly effective pasty contrast agent

Added customer value

- Ready made
- Fast drying
- No flaking
- More accurate, easier processing due to pasty consistency
- Special pigment incorporated enables more accurate, easier inspection of machined workpieces
- Spotting paste easily removed with EOSOL solvent A

Image may differ from the original.

Technical data:

Appearance:	Obtainable in red and blue
Consistency:	Pasty
Density is:	1.125 g/ml
Dripping point:	50 °C
Temperature range for application:	10 °C to 40 °C
Critical temperatures:	Below 0 °C and above 40 °C

Application method (recommended)

- For inspecting machined metallic surfaces, making workpiece contact patterns discernible, inspection of mechanical processing and verification of fit accuracies

Standard packaging units: Tins with 250 ml and 500 ml and tubes with 80 ml. Additional packaging on request.
Our general terms and conditions apply.
