

Adler Etching Solution

Art.-No. 2344

For visualization of coarse grain and inspection of welds

Customer added value

- It is dimensioned so that even fine details are reproduced
- Primarily this etchant is used for macroscopic evaluation of welds
- The different weld layers, transition areas and heat affected zones are well highlighted
- Ideal for highlighting steel structures, such as Damascus steel

Technical data

Appearance	dark brown
Consistency	liquid

Application area

The etchant is suitable for all steels (also high-alloy and rust- and acid-resistant grades) as well as for cast iron and nickel alloys
